Informed Consent

We are asking you to participate in a research study titled “R2G Collaborative Evaluation Project.” This evaluation is led by Dr. Shorna Allred, at Cornell University. The activities that you are asked to complete will help identify student and community outcomes from the R2G project, and rate the value of those outcomes on three factors.

There are three different activities in this evaluation project. We may invite you to do one, two, or all three activities.

a. In the Brainstorming activity, participants provide some ideas by completing a phrase with as many different responses as they can think of. They may create an anonymous login, but no identifying information is collected.

b. In the Sorting activity, participants sort ~100 statements into related groups, and provide labels for those groups. They will create a logon and answer some non-identifying demographic questions.

c. In the Rating activity, participants rate ~100 statements on three different scales of importance or value. They will create a logon and answer some non-identifying demographic questions.

Risks/Benefits - We do not anticipate either risks or direct benefits to you from participating in this evaluation. However, the results of this evaluation will help guide decisions about future efforts of the R2G opportunities for students and rustbelt communities. There is no compensation for participation in this project. Project results will be made publicly available.

Privacy/Confidentiality/Data Security

- Names and emails are from program records or internet searches are used. This information is not utilized in data analysis, and no data or results will be traceable back to a name or email.

- All data will be de-identified, replacing identifying information with unique identifiers. The de-identified data might be used for future analysis or research by this PI without additional consent. Due to this possibility, the PI will store unique identifiers with identifying information separately in her own database on University equipment, or University networks secured by Cornell Identity management policies, processes and infrastructure, making data accessible only by authorized R2G program staff.

- Please note that the concept mapping software is developed and hosted by Concept Systems, Inc., a company not affiliated with Cornell and with its own privacy and security policies that you can find at its website. We anticipate that your participation in this software presents no greater risk than everyday use of the Internet.

- We use email to send invitations and reminders for project activities. Please note that email communication is neither private nor secure. Though we are taking precautions to protect your privacy, you should be aware that information sent through email could be read by a third party.

Your participation is voluntary. You may refuse to participate before starting, discontinue at any time, or skip any questions or procedures that make you uncomfortable without consequence to your relationship with the university or the R2G project.

If you have questions, please ask them before getting started. The main researcher conducting this study is Shorna Allred, Professor of Natural Resources at Cornell University, email srb237@cornell.edu, and phone 607-255-2149. Her contact information is also in the email invitation that you received. If you have any questions or concerns regarding your rights as a subject in this study, you may contact the Institutional Review Board (IRB) for Human Participants at 607-255-5138 or access their website at http://www.irb.cornell.edu. You may also report your concerns or complaints anonymously through Ethicspoint online at www.hotline.cornell.edu or by calling toll free at 1-866-293-3077. Ethicspoint is an independent organization that serves as a liaison between the University and the person bringing the complaint so that anonymity can be ensured.
Welcome

Welcome to our R2G Collaborative Evaluation Project site for concept mapping. We are excited to have you join us. Your voice is very important to the success of the project, so Thank You for being here. Working with both Utica’s and Binghamton’s diverse citizenry and groups - R2G has catalyzed constructive local action, helping propel each city on a uniquely tailored pathway from rust toward greener futures and restored prosperity. This project will address both Utica and Binghamton communities.

Tutorial launches first time through. Read this before closing it too quickly.

Tutorial (aka “Intro”) can be accessed again later by clicking on these three dots.
Tutorial introduces you around the page – navigate the tutorial by clicking “NEXT”
Tutorial introduces you around the page – navigate the tutorial by clicking “NEXT”
Tutorial introduces you around the page – navigate the tutorial by clicking “NEXT”.
1. Enter your response to the prompt here

2. Click ADD STATEMENT
3. After you click the green button to save, the statements will appear on the right side of the page. Refresh to see if others are adding at the same time as you.

4. Enter another response – repeat until all your responses are exhausted.

5. Click finish when you are done.
Come back to review what others have added and add some more responses as long as the project remains open.
