CRITICAL ISSUES IN HIGHER EDUCATION CONFERENCE

Universities as Economic Drivers
Measuring Success

The conference will provide best evidence on how higher education institutions can:

- Exert greater impact on economic growth;
- Better measure performance in improving economic outcomes;
- Lead economic development in their regions while still performing their traditional educational functions;
- Help build community among scholars and practitioners in these efforts.

From 2010 forward, SUNY’s priority is the economic revitalization of the State of New York and a better quality of life for all its citizens. Please visit: www.suny.edu for more information
